¹ If you plan to attend graduate or professional school you will want to complete the CHM 241/241 sequence.

² Choose one of the following to complete the math cognate for the major: MTH 125: Survey of Calculus, MTH 201: Calculus, or STA 215: Introductory Applied Statistics.

³Students must complete a total of two courses with an SWS attribute.

⁴ MTH 122/123 are prerequisites for PHY 220 and are not part of the Biology major. If a student chooses to take PHY 200, MTH 123 does not need to be completed. PHY 221 is not required but students planning to attend graduate school, professional school, or to pursue secondary teacher certification should complete the PHY 220/221 sequence.

⁵ Elective refers to any course to help you earn the required 120 credits to graduate. See reverse for animal biology courses that may be of interest.

⁶ Animal biology majors must take one course in plant biology. See reverse for plant biology elective options.

Biology students can pursue a Bachelor of Arts or Bachelor of Science degree. Students who wish to obtain a BA must fulfill 3rd semester proficiency in a foreign language (201 level). The BS degree requirements are incorporated into the major requirements
