\*The block tuition rate is for 12-15 credits. You will pay additional tuition for any credits over 15

<sup>1</sup>Transfer and incoming students with BIO 120 credit may substitute BIO 120 for CMB 155 but will still need to take CMB 156. CMB majors who have AP/IB Credit in BIO 120, CHM 115 and/or CHM 116 are generally better prepared for higher level courses if they take CMB

155+156, CHM 115 and CHM 116 at GVSU. CHM 100 is designed for students who did not have a full year of high school chemistry or whose standardized test scores indicate they may struggle with CHM 115.

<sup>2</sup> Math proficiency exams are available for MTH 122 and MTH 123. *To take the Math Proficiency Tests online, visit this link: gvsu.edu/s/mv* <sup>3</sup>Students who self-place into WRT 120 should take this course in the fall semester and then take WRT 130 in the winter semester of their first year. Students will not need to take WRT 150 if they have earned credit for the course through AP/Dual Enrollment. A grade of C or better is required in WRT 130 or 150 in order to satisfy the WRT requirement at GVSU.

<sup>4</sup> Students must have a **minimum of 120 credits** to graduate with **58 of the 120 credits** being from a senior level institution and the **final 30 of the 120 credits** completed at GVSU. Elective refers to any course that will help meet these requirements. See list below for suggested elective courses.

<sup>5</sup>Students may choose CHM 245, 246, 247, and 248 in place of CHM 241 and 242

<sup>6</sup> Students must select a math/physics option A or B. MTH 122 and 123 must be completed or waived prior to beginning either option. **Option A**: MTH 125 Survey of Calculus, PHY 220 General Physics I, and PHY 221 General Physics II

**Option B**: MTH 201 Calculus I, MTH 202 Calculus II, PHY 230 Principles of Physics I, and PHY 231 Principles of Physics II <sup>7</sup>Students must complete a total of two courses with an SWS attribute

#### Declaring the Cell and Molecular Biology Major:
