If you received a Duo enrollment email, please follow these additional instructions after setting up your account: https://www.gvsu.edu/cms4/asset/6C7C9BEF-9878-D13D-540F42A5A8912CE1/gvsu_vpn_using_duo_instructions.pdf

Downloading and Installing Pulse Secure

1. From your web browser go to gvsoftware.gvsu.edu And you get the page below:

2. Select Student or Staff/Faculty links and then choose your version of Pulse Secure (Mac, 32 bit Windows, 64 bit Windows, Red Hat/CentOS, Ubuntu/Debian)

3. Use your GVSU network credentials to sign in and begin the download

Jsername			
assword			
		Sign in	Cancel

4. When the Application opens, click on Install to start:

5. It will run through install and then indicate it has finished.

6. Open Pulse Secure

The following screen will appear:

you might see an SA account that has been auto created, this can be ignored.

Click the "+" button in upper right corner to create the GVSU connection 2.

Fill out the Name and Server URL just as listed below then click Add

Add Connection	×
Type:	
Policy Secure (UAC) or Connect Secure (VPN)	~
Name:	
GVSU VPN Student	
Server URL:	
vpn.student.gvsu.edu	
Connect Add Cance	

Student

3. Now you have a connection setup that you can use to **Connect** or **Disconnect**

4. When you click on the **Connect** button. You are prompted for your UserName and Password (same as Outlook & Blackboard)
