

SOUTH KOREA

A GVSU PARTNERSHIP PROGRAM

South Korea: Seoul National University of Science and Technology (SeoulTech)

Open to: All majors

TELL ME ABOUT THIS PROGRAM

SEOUL, SOUTH KOREA: Seoul National University of Science and Technology (SeoulTech) is a national university of about 14,000 students. The vast majority of the students are studying in technology, computing, or engineering fields, although the school is also known for outstanding programs in business, education and a world-renowned art education in ceramics.

SeoulTech is located on the outskirts of Seoul. By subway, students are about 40 minutes from central Seoul. Seoul is a very lively and energetic city. There are numerous market areas, affordable restaurants, and UNESCO World Heritage sites. Seoul is a leader in Asia and has taken a role on the global stage as one of the top world economies. Students will enjoy a culturally rich environment mixed with some of the best technological advances.

As part of the orientation program, GVSU students will be paired with a SeoulTech student as part of the Buddy program. There are limited courses taught in English. Most courses in English are in the areas of management, information systems, engineering, finance, marketing, architecture, and ceramics. Courses in English for fall semester will be made available in July. For the winter semester, courses taught in English will be available in January. The Korean language and culture courses are highly recommended for international students.
