Science Olympiad was designed to help students build STEM skills and understanding through inquiry-based challenges, starting in kindergarten all the way through high school. MSO engage industry professionals, institutions of higher education, community mentors, and Science Olympiad alumni to ensure that our programming exposes students to the latest scientific innovations and breakthroughs and prepares them for what's next.

Careers

FORENSIC SCIENCE TECHNICIAN

Forensic Science Technicians collect, identify, classify, and analyze physical evidence related to criminal investigations. They perform tests on weaponry substances, such as fiber, hair, and tissue to determine significance to investigation.

CHEMICAL ENGINEER

Chemical engineers apply the principles of chemistry, biology, physics, and math to solve problems that involve the production or use of chemicals, fuel, drugs, food, and many other products. They design processes and equipment for large-scale manufacturing, plan and test production methods and byproducts treatment, and direct facility operations.
