A Career in Physics

A physicist works to explain how forces, structures, and phenomena affect the natural world. This position requires extensive amounts of research to produce reports and technical papers that contribute to the industry at large as well as lecturing and teaching students about the laws of physics.

Careers in Physics

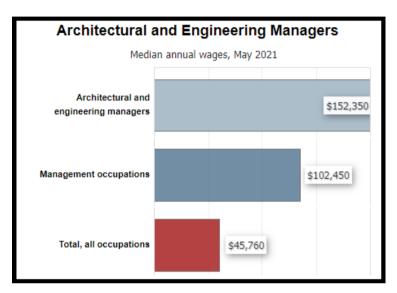

Science Olympiad was designed to help students build STEM skills and understanding through inquiry-based challenges, starting in kindergarten all the way through high school. MSO engage industry professionals, institutions of higher education, community mentors, and Science Olympiad alumni to ensure that our programming exposes students to the latest scientific innovations and breakthroughs and prepares them for what's next.

Careers

ARCHITECTUAL ENGINEER

Architectural and engineering managers use their knowledge of architecture or engineering to oversee a variety of activities. They may direct and coordinate construction or manufacturing related to production, operations, quality assurance, testing, or maintenance.

PHYSICISTS

Physicists and astronomers study the interactions of matter and energy. Theoretical physicists and astronomers may study the nature of time or the origin of the universe. Some physicists design and perform experiments with sophisticated equipment such as particle accelerators, electron microscopes, and lasers.
