Danche Gjorgjievski
Chief Technology Officer

Danche Gjorgjievski, Chief Technology Engineer for ADAC Automotive, is an Engineering Leader experienced in working with cross-functional teams, enabling product development that aligns with technological trends to meet customer and business needs. She strives to find solutions that drive innovation and growth through effective collaboration within all levels of the organization.

Danche began her career as an automotive software engineer. She has 18 years of global electronics engineering leadership at Prince/Johnson Controls/Visteon. Danche spent 6 years leading innovation and growth strategy in aerospace and defense, including a product for the Artemis II. She was the Vice Chair of the MEMA Advance Technology Council.

Danche is an executive member of AHA, helping to ensure healthy hearts in West Michigan. Her passions include EVs, the power of AI, and innovation in all that is done at both at ADAC and in society.
